

Summary

As the blockchain industry continues to evolve and expand, Ethereum Inscription DAO has emerged as a driving force propelling the sector forward. With a visionary outlook and an inclusive ethos, it has successfully implemented numerous groundbreaking concepts and transformative projects. Rooted in collective wisdom and always embracing diverse perspectives from its ecosystem users and community members, the key to Ethereum Inscription DAO's prominence lies in its commitment to progress and innovation. Continuously striving for advancement and adaptability is both a call of the industry and the core development principle of Ethereum Inscription DAO.

Vision and Solutions

Vision: Help existing inscription projects return to decentralization, and help future inscription projects return to decentralization.

Solution: Bring Inscription back to decentralization by deploying and minting it without consuming Gas.

Principles

Ethereum Inscription DAO is a Decentralized Autonomous Organization (DAO), operating differently than traditional companies. It adopts a decentralized governance model, attracting a diverse group of participants who collectively govern by holding ETINS Coin. The platform invites all DAO participants to propose ideas for promoting the development of the ecosystem, whether through collaboration with other projects or advancing the Ethereum Inscription DAO protocol itself. ETINS Coin holders possess voting rights, which grants them the ultimate decision-making power over the direction of Ethereum Inscription DAO.

Governance

Ethereum Inscription DAO relies on collective self-governance by ETINS Coin holders, embodying an open and participatory nature. Participants can initiate preliminary proposals on the Ethereum Inscription DAO forum and later present formal proposals within the DAO's governance module. ETINS Coin holders have the freedom to exercise, delegate, and enjoy their voting rights throughout the decision-making process.

All decisions stem from proposals initiated by ETINS Coin holders and subsequently voted upon by the community, ranging from launching new projects and beyond.

Governance Token

ETINS (\$ETINS) is the governance token of Ethereum Inscription DAO.

Issued on the Ethereum Inscription Chain network, add to Metamask:
Network name: Ethereum Inscription Mainnet
RPC URL: <https://rpc.etins.org>
Chain ID: 1617
Currency symbol: ETINS

ETINS Coin Distribution

The governance token of Ethereum Inscription DAO is \$ETINS, with an initial total supply of 1,000,000,000,000 tokens. Ethereum Inscription DAO adopts a strategic distribution plan for ETINS Coin aimed at fostering inclusivity and decentralized governance. This distribution scheme represents a commitment to transparency and community participation in the ecosystem, reflecting Ethereum Inscription DAO's vision of cultivating a diverse and vibrant environment where contributors, innovators, and stakeholders jointly advance blockchain industry growth.

Airdrop: 70%

Ecosystem Development: 10%

Foundation: 10%

Developers: 10%

This scheme not only serves the distribution of ETINS Coin but also focuses on nurturing a dynamic ecosystem where every participant plays a critical role in shaping decentralized governance and blockchain innovation.

Governance Discussions

Ideas that garner widespread community support can be proposed and voted on. Community members can initiate preliminary proposals or discussions, potentially leading to the official Ethereum Inscription DAO voting process. Not all proposals undergo initial assessment or voting will necessarily be implemented. Proposals require the backing of the development team, thorough code audits, and ultimately deployment by multi-signature administrators.

Frequently Asked Questions

What is Ethereum Inscription DAO?

Ethereum Inscription DAO is a pioneering decentralized autonomous organization within the blockchain ecosystem, with a vision centered on developing open finance and a decentralized ETINS economy. Its foremost priority is to entrust governance to ETINS Coin holders, warmly welcoming users and the community to join forces for shared growth and success.

Who governs Ethereum Inscription DAO?

The governance of Ethereum Inscription DAO resides in the hands of ETINS Coin holders. Each individual holding ETINS Coin has both the right and responsibility to make decisions that determine the direction and resource allocation of Ethereum Inscription DAO.

Is Ethereum Inscription DAO a registered entity?

Ethereum Inscription DAO is not a conventional registered company; rather, it is a collective organization composed of ETINS Coin holders, governing themselves through multiple smart contracts deployed on the blockchain.

Why does Ethereum Inscription DAO adopt this organizational structure?

A DAO (Decentralized Autonomous Organization) is a governance framework chosen by many DeFi and crypto projects. This decentralized autonomous organization allows for collective decision-making without being controlled by any single entity. However, decentralization and autonomy are ongoing evolutions due to factors such as:

The effectiveness of decisions made within the DAO.

The necessity of coordinating development teams and administrators during the project's early stages.

Striking a balance between decentralization and fair incentivization for contributors.

For Ethereum Inscription DAO, true innovation stems from the synergistic fusion of diverse viewpoints within the blockchain community.

Is Ethereum Inscription DAO secure?

Security for Ethereum Inscription DAO, like any other crypto project, is subject to various factors, including risks of asset loss, smart contract vulnerabilities, attacks, and potential errors by multi-signature administrators. To enhance security and boost user confidence, Ethereum Inscription DAO engages independent third-party experts to conduct comprehensive smart contract audits. The platform's community actively monitors and responds to potential threats, collaboratively contributing to a safer, more stable DAO ecosystem. In-depth understanding and informed decision-making are crucial in the blockchain domain. Therefore, conducting thorough research and due diligence is essential before participating in any blockchain project.

How to participate in Ethereum Inscription DAO?

Ethereum Inscription DAO warmly invites various parties to engage and contribute:

Community Members: Even those without ETINS Coin can participate in platform forums and social media activities, sharing innovative ideas. Valuable concepts might be adopted by ETINS Coin holders, and community leaders may be granted voting rights to influence the community's direction.

Independent Contributors: Individuals or teams that can contribute to the advancement of the Ethereum Inscription DAO protocol, facilitate due diligence, and explore collaboration opportunities with other projects are invaluable contributors.

Ecosystem Liquidity Providers: Active participants voluntarily providing liquidity to the ecosystem are integral members of Ethereum Inscription DAO. By expanding the platform's DeFi applications, encouraging developer activity, increasing smart contract interactions, and supporting various DApp scenarios, they help build a stronger Ethereum Inscription DAO ecosystem.

DAO Partners: We sincerely welcome projects willing to contribute to the Ethereum Inscription DAO ecosystem and explore partnership opportunities between their respective protocols.

Token Holders: ETINS Coin holders hold proposal and voting rights, deciding the future course of Ethereum Inscription DAO and the allocation of its treasury assets. Your involvement is crucial in shaping the platform's future.

Contact Information

If you need further clarification on Ethereum Inscription DAO or have any questions or support needs, please feel free to contact us via the following: https://twitter.com/etins_org

We are committed to addressing any inquiries regarding ETINS Coin, Ethereum Inscription DAO governance, or related topics. Your feedback and participation are vital to building our vibrant and inclusive blockchain community.

Disclaimer

Ethereum Inscription DAO is a decentralized autonomous organization composed of all ETINS Coin holders. It is not a legal entity and does not aim to centrally manage the ETINS Coin supply. ETINS Coin do not inherently possess utility prior to issuance; however, in future DAO governance

, ETINS Coin holders may vote to assign utility. There is no preset roadmap for inherent value in Ethereum Inscription DAO or ETINS Coin. ETINS Coin do not represent any claim or entitlement to any real-world or financial assets and do not provide or guarantee any return value. ETINS Coin holders should not anticipate any such claims or returns. Like typical ETH tokens, ETINS Coin have no inherent, intrinsic, or investment value.
